GEMINI STAR MATRIX

• HUMAN WEALTH IS ABOUT TO ADVANCE TO A HIGHER LEVEL. •

»»» THE SPIRIT

WHERE DO WE COME FROM?

FACTORY-U is a Web3-native AI model developed and invested in by Facebook AI Infrastructure.

WHAT DO WE DO?

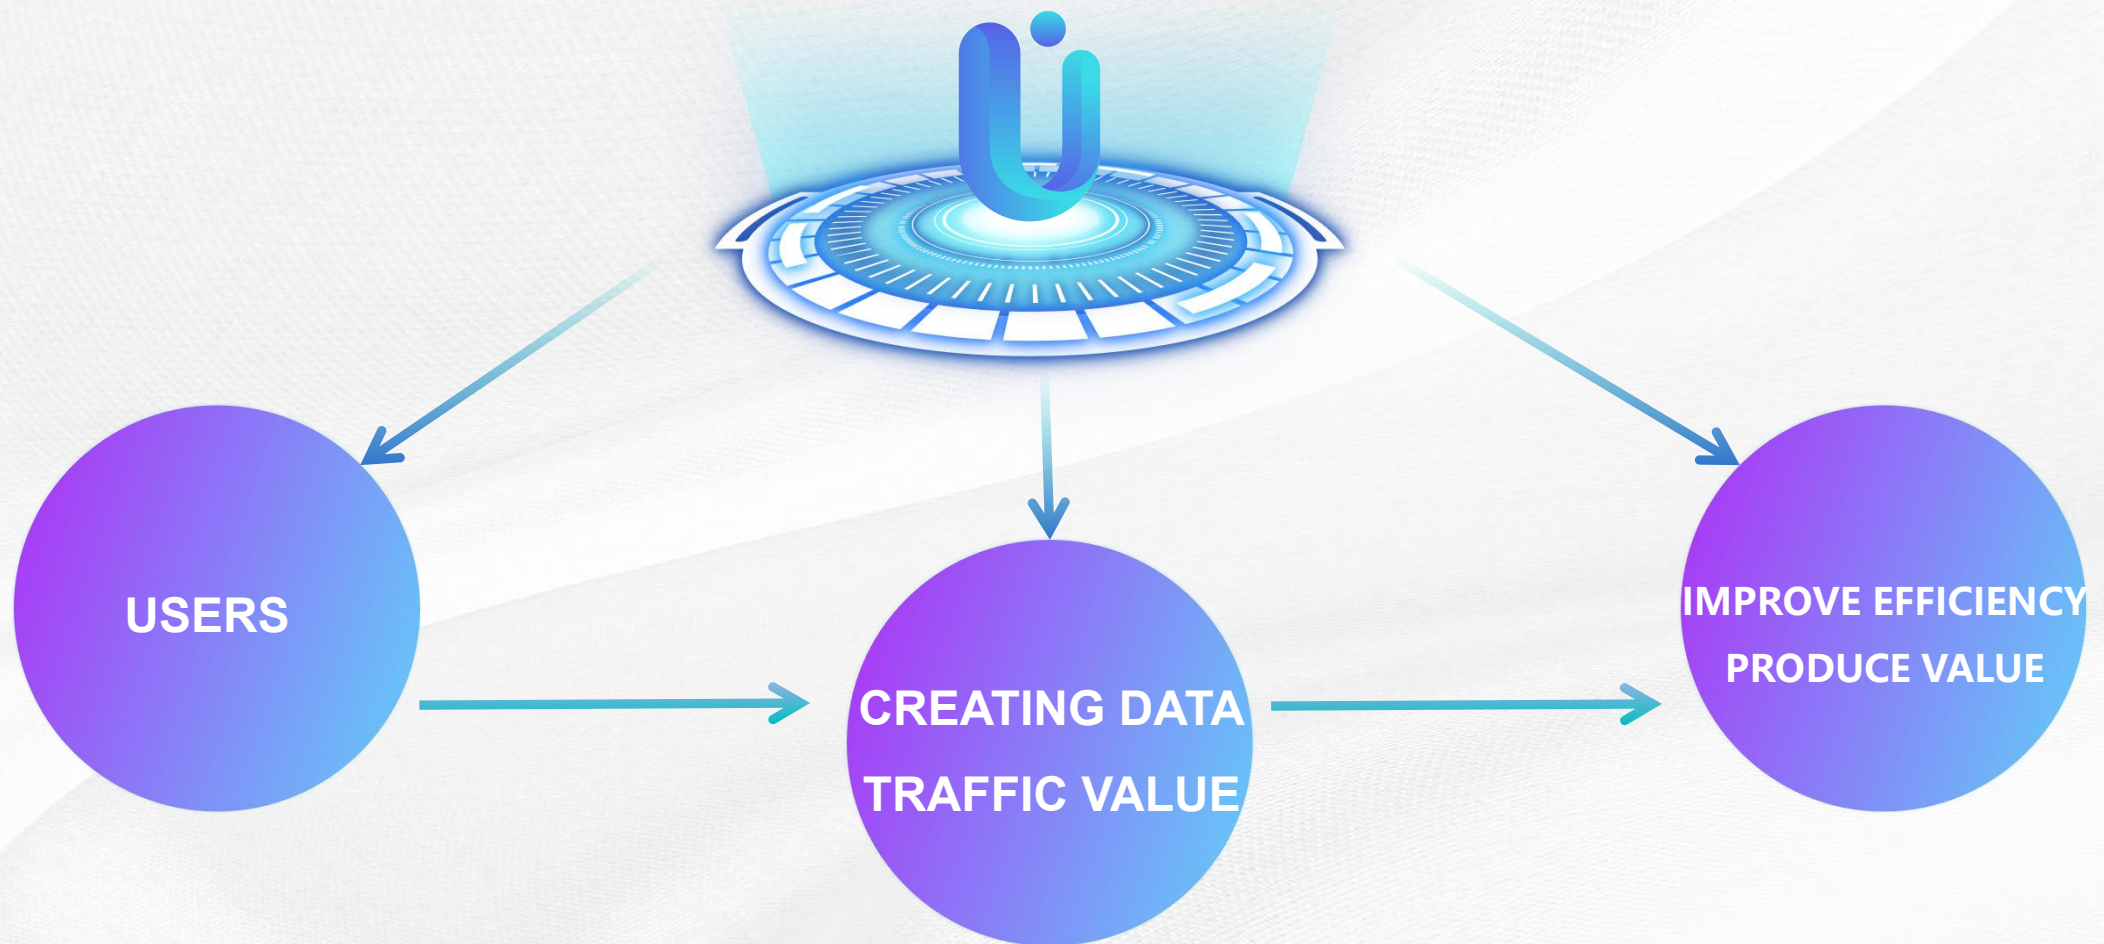

It helps creators efficiently produce profitable original content and builds a platform for mutually beneficial collaboration between contributors and creators.

WHAT IS OUR VISION?

It ensures that every creation and interaction becomes the foundation of a community of shared value.

USERS CAN BENEFIT FROM CO-CREATION OF AI CONTENT SYSTEMS.
USERS ARE THE BENEFICIARIES OF DATA FEEDBACK.

BNB MATRIX

GEMINI STAR MATRIX

| FACTORY-U MATRIX NODE | | | | | | | | | |
|-----------------------|---|------|------|------|------|------|------|------|------|
| SUB | S1 | S2 | S3 | S4 | S5 | S6 | S7 | S8 | S9 |
| RETURN | 2 | 2.25 | 2.5 | 2.75 | 3 | 3.25 | 3.5 | 3.75 | 4 |
| FEE (BNB) | 0.02 | 0.04 | 0.08 | 0.16 | 0.32 | 0.64 | 1.28 | 2.56 | 5.12 |
| MATRIX (Lv15) |  <p>(Gemini Migration Model)</p> | | | | | | | | |

The Gemini Star Matrix has nine levels of nodes, and users must gradually upgrade. Each node has 15 layers of matrices
Sharing new users will earn corresponding incentives, and users will be automatically eliminated after reaching a certain profit multiple

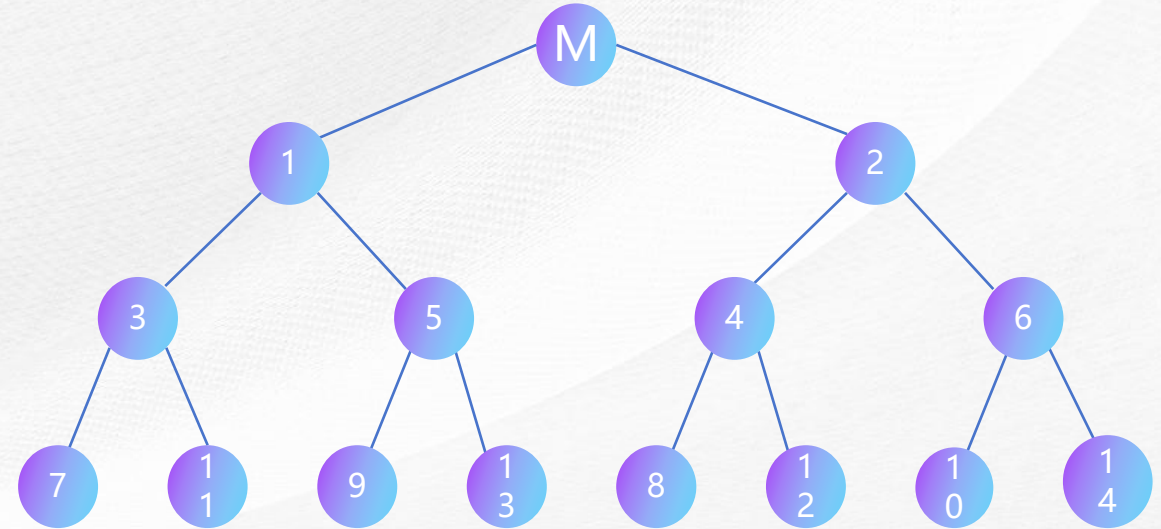

GEMINI MIGRATION

In the "**Double Migration Matrix**" mechanism, each user can have up to two direct referrals. When a node already has two direct referral slots, a new member joining will be migrated to the next suitable position, filling the vacant position at the next level.

Users must gradually upgrade from node S1 to S9, with higher levels earning more incentives. Through migration, replacement, and tiering plans, the platform ensures "greater contributions, greater rewards," achieving fair distribution.

When you create two new subordinates, the first-level twin matrix will be filled.

When you share again, the new user will automatically move to **position 3**.

When you share again, the new user will automatically move to **position 4**.

And so on. When the 4 matrices on the second layer are full new users will be pushed directly to the corresponding empty positions

NODE MATRIX EXAMPLE

When you use BNB to upgrade your node and share directly the smart contract will automatically execute a 20% profit distribution

If you upgrade to **S9**, then your node cost will be:

$$0.02 + 0.04 + 0.08 + 0.16 + 0.32 + 0.64 + 1.28 + 2.56 + 5.12 = 10.22 \text{ BNB}$$

According to the "**Gemini Star Matrix**" mechanism, if you recommend 2 people in each matrix from **S1 to S9**, your total direct referral income will be:

$$(0.02 + 0.04 + 0.08 + 0.16 + 0.32 + 0.64 + 1.28 + 2.56 + 5.12) \times 20\% \times 2$$

=4.088 BNB

THE MORE YOU SHARE, THE MORE DIRECT INCENTIVES YOU GET

30% NODE DESCRIPTION

In addition to the 20% direct referral incentive
The smart contract will automatically execute 30% for passive incentives for matrix migration
Taking the first-level node matrix as an example, filling the 15-layer matrix, the income calculation is as follows:

TOTAL REVENUE: 26.2134 BNB 

| MATRIX LEVEL | COMMUNITY DID | MATRIX REVENUE | TOTAL REVENUE PER LAYER |
|--------------|---------------|-----------------------|----------------------------|
| 1 | 2 | $0.02 * 2\% = 0.0004$ | $0.0004 * 2 = 0.0008$ |
| 2 | 4 | 0.0004 | $0.0004 * 4 = 0.0016$ |
| 3 | 8 | 0.0004 | $0.0004 * 8 = 0.0032$ |
| 4 | 16 | 0.0004 | $0.0004 * 16 = 0.0064$ |
| 5 | 32 | 0.0004 | $0.0004 * 32 = 0.0128$ |
| 6 | 64 | 0.0004 | $0.0004 * 64 = 0.0256$ |
| 7 | 128 | 0.0004 | $0.0004 * 128 = 0.0512$ |
| 8 | 256 | 0.0004 | $0.0004 * 128 = 0.1024$ |
| 9 | 512 | 0.0004 | $0.0004 * 512 = 0.2046$ |
| 10 | 1024 | 0.0004 | $0.0004 * 1024 = 0.4096$ |
| 11 | 2048 | 0.0004 | $0.0004 * 2048 = 0.8192$ |
| 12 | 4096 | 0.0004 | $0.0004 * 4096 = 1.6384$ |
| 13 | 8192 | 0.0004 | $0.0004 * 8192 = 3.2768$ |
| 14 | 16384 | 0.0004 | $0.0004 * 16384 = 6.5536$ |
| 15 | 32768 | 0.0004 | $0.0004 * 32768 = 13.1072$ |

15TH-LAYER NODE INCOME

Each node matrix is filled with 15 layers of matrices to perform profit deduction:

| NODE LEVEL | BNB REQUIRED FOR NODES  | DID | REVENUE (BNB) |
|------------|--|--------------|---|
| S1 | 0.02 BNB | 65534 PEOPLE | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 0.02 \times 2\% = 26.2134 \text{ BNB}$ |
| S2 | 0.04 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 0.04 \times 2\% = 52.4268 \text{ BNB}$ |
| S3 | 0.08 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 0.08 \times 2\% = 104.8536 \text{ BNB}$ |
| S4 | 0.16 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 0.16 \times 2\% = 209.7072 \text{ BNB}$ |
| S5 | 0.32 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 0.32 \times 2\% = 419.4144 \text{ BNB}$ |
| S6 | 0.64 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 0.64 \times 2\% = 838.8288 \text{ BNB}$ |
| S7 | 1.28 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 1.28 \times 2\% = 1677.6576 \text{ BNB}$ |
| S8 | 2.56 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 2.56 \times 2\% = 3355.3152 \text{ BNB}$ |
| S9 | 5.12 BNB | | $(2+4+8+16+32+64+128+256+512+1024+2048+4096+8192+16384+32768) \times 5.12 \times 2\% = 6710.6304 \text{ BNB}$ |

5% DIRECT REFERRAL ACTIVE USER AWARD

When users across the network use BNB to activate nodes, a smart contract will automatically allocate 5% of the funds to a direct referral reward pool for active users.

Based on a 24-hour ranking of active accounts, the top five users with the most direct referrals will receive user incentives. The ranking will be reset after 24 hours.

| RANK | INCENTIVE PERCENTAGE |
|------|----------------------|
| 1 | 40% |
| 2 | 25% |
| 3 | 18% |
| 4 | 10% |
| 5 | 7% |

EXAMPLE

Within 24 hours today, a total of 10,000 BNB nodes were activated across the network. 500 BNB, or 5%, will be used to incentivize active direct referrals.

First place: $500 \times 40\% = 200$ BNB

Second place: $500 \times 25\% = 125$ BNB

Third place: $500 \times 18\% = 90$ BNB

Fourth place: $500 \times 10\% = 50$ BNB

Fifth place: $500 \times 7\% = 35$ BNB

10% INSIGHT AWARD

When users use BNB to participate, 10% will be automatically converted into reward points according to the smart contract.

| MATRIX LEVEL | INCENTIVE PERCENTAGE | INCENTIVES PER LEVEL |
|--------------|----------------------|----------------------|
| 1-5 | 50% | 1% |
| 6-10 | 30% | 0.6% |
| 11-15 | 20% | 0.4% |

Also take **S4**, **S7**, **S9** as an example, fill up 5 layers

| LEVEL | BNB REQUIRED FOR NODES | REVENUE (BNB) |
|-----------|------------------------|---|
| S4 | 0.16 BNB | $(2+4+8+16+32) \times 0.16 \times 1\% = 0.0992$ BNB |
| S7 | 1.28 BNB | $(2+4+8+16+32) \times 1.28 \times 1\% = 0.7936$ BNB |
| S9 | 5.12 BNB | $(2+4+8+16+32) \times 5.12 \times 1\% = 3.1744$ BNB |

5% PREMIER AWARD

When all network users open the FACTORY-U node, 5% of the funds will be automatically allocated to incentivize advanced users.

REWARD STANDARDS

- ① Personal nodes must be \geq S4 or above
- ② Must directly promote two S3 or above node users

| LEVEL | VERIFICATION | REWARDS |
|-------|----------------|---------|
| S4 | Promote two S3 | 20% |
| S5 | Promote two S3 | 30% |
| S6 | Promote two S3 | 50% |

For example, within 24 hours today, a total of 10,000 BNB was consumed across the network for node activation. 5% of this (500 BNB) will be used as rewards to encourage high-level nodes to continue to promote active users within the Matrix.

»»» \$FACT GROWTH LOGIC

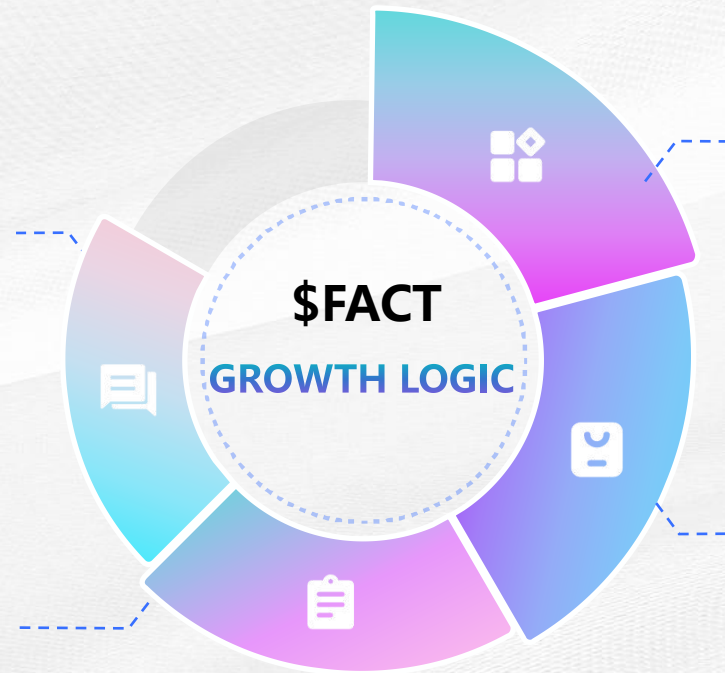

\$FACT's growth isn't driven by emotion, but by

CONTINUOUS DEFLATION

Ecosystem destruction deflation to 1 million BNB

REAL MINTING

30% of each BNB transaction will be used to mint \$FACT

ECOSYSTEM AGGREGATION

Leveraging the massive transaction activity of the BNB public chain's numerous nodes

BALANCED RELEASE

Daily release volume will be dynamically adjusted based on price fluctuations

COMPUTING MINING

| LEVEL | COMPUTING |
|-------|-----------|
| S1 | 0 |
| S2 | 0 |
| S3 | 0 |
| S4 | 1600 |
| S5 | 3200 |
| S6 | 6400 |
| S7 | 12800*1.3 |
| S8 | 25600*1.5 |
| S9 | 51200*1.7 |

Daily \$FACT mined by an individual =
\$FACT released by the entire network \times [individual hashrate \div total network hashrate]

Each direct referral boosts hashrate by 50%, accelerating \$FACT release.

COMPUTING MINING

When the node level reaches **S7-S9**, you will get a computing power multiplier bonus

Assume today's **\$FACT** output is 10,000

Total network hashrate is 200,000

Using **S7, S8, S9** as an example

the release of \$FACT will be accelerated, resulting in more \$FACT being generated daily.

S7 DAILY REVENUE: $10,000 \times \left[\frac{12,800 \times 1.3}{200,000} \right] = 832 \text{ \$FACT}$

S8 DAILY REVENUE: $10,000 \times \left[\frac{25,600 \times 1.5}{200,000} \right] = 1920 \text{ \$FACT}$

S9 DAILY REVENUE: $10,000 \times \left[\frac{51,200 \times 1.7}{200,000} \right] = 4352 \text{ \$FACT}$

Based on a daily release volume of 10,000 tokens

S7, S8, S9 account for **8.32%, 19.2%, 43.52%** of the daily release volume, respectively

Faster release, higher returns, and greater coin equity

DESTRUCTION MECHANISM

Users can trigger FACT mining by investing 0.01 BNB (the reserve price).

Each 0.01 BNB worth of FACT invested earns 200 hashrate points.
This translates to 0.02 BNB worth of FACT mining revenue.

Invest 0.01 BNB worth of FACT.

30% goes to the donation pool, and 70% is completely destroyed by smart contract execution.

FOR EXAMPLE:

\$BNB market price is 800 USDT/coin; \$FACT market price is 1 USDT/coin.

When investing 0.01 BNB, $800 \times 0.01 \times 1 = 8$ FACT is invested.

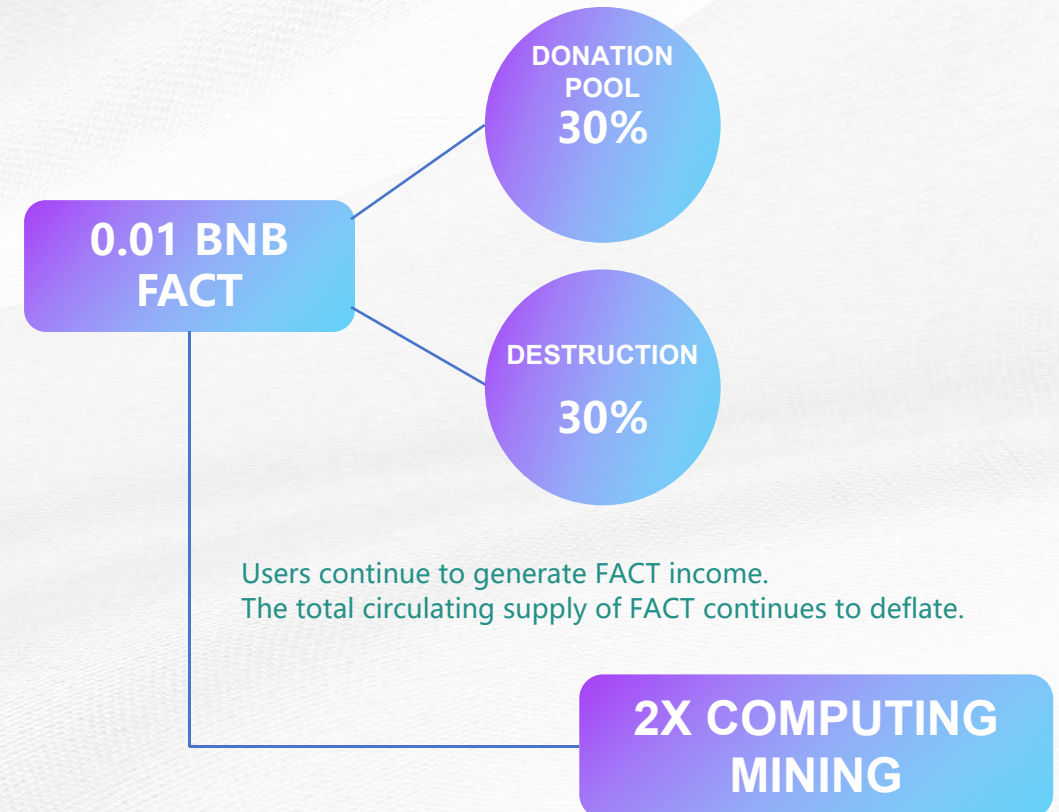

- **Part of the donation pool:** $8 \times 30\% = 2.4$ FACT
- **Part of the smart contract destruction:** $8 \times 70\% = 5.6$ FACT
- **Part of the mining revenue destroyed:** $800 \times 0.02 \times 1 = 16$ FACT

Continuously promoting deflation!

Continuously driving the consensus value of FACT.

PUBLIC CONSENSUS SUPPORTS THE DESTRUCTION MECHANISM

PROMOTE THE GROWTH OF FACT'S VALUE

➤➤➤ \$FACT TEAM BENEFITS

| LEVEL | PERFORMANCE (BNB) | DIVIDENDS (Transaction buy/sell tax allocation) |
|-------|----------------------|--|
| U1 | 1 | 0.50% |
| U2 | 5 | 0.50% |
| U3 | 10 | 0.50% |
| U4 | 50 | 0.25% |
